## PROJECTS

---

### Easy Plan

[Live Website](#) | [Source Code](#)

Tourist can make a list of must visit places easily as per their choice for city, province and categories. As per their list they see a necessary information they must know before to visit at the same time on search.

- User can compare and plan a trip as they see all the result together. Link a direct booking link so reduce time to pull up fishing websites.

**Technologies:** HTML, CSS, JavaScript

### Ball Game

[Live Website](#) | [Source code](#)

- Balls are falling from top to bottom, on Click Effect balls are disappearing and adding to the score.
- When anyone ball touch to bottom game will be over and reset the score from 0. Rolling eye image created with the CSS animation.

**Technologies:** HTML, CSS, JavaScript

### Frontend Bootcamp

[Live Website](#) | [Source code](#)

- Frontend Bootcamp is a dummy website for educator frontend.
- Investigating about responsive website, accordion dropdown, showing google map.
